ELENA BROOKS

Product Designer · Independently authored fictional resume

m2-narrow-five-letter@example.com · https://portfolio.example/m2/m2-narrow-five-letter

PROFILE

Product designer focused on accessible public-service interfaces and documented decisions.

EXPERIENCE

Juniper Library Studio · Product Designer · 2021–2025 · Fictional employer

• Designed accessible appointment flows for the fictional Juniper Library, testing keyboard navigation and clear error recovery with staff, then documented the interaction decisions so engineering could implement consistent states across desktop and mobile screens.

• Built a reusable component inventory with engineering partners, recording focus order, contrast checks and content guidance for forms and tables, and used the inventory during weekly design reviews to keep the library scheduling interface consistent.

• Facilitated moderated research sessions for a fictional service portal, organized observations into a shared evidence log and separated reported needs from assumptions, then used prototypes to clarify confusing renewal and appointment tasks before implementation.

• Reviewed responsive prototypes with developers and support staff, checking tasks on narrow and wide viewports, documenting unresolved usability issues and comparing changes with supplied research notes.

• Documented a fictional service workflow with operations partners, mapping handoffs and exception states in plain language, then created a small prototype to test whether applicants could locate the next action without depending on color or hover-only instructions.

SKILLS

Figma · Prototyping · Accessibility · Design systems · Research synthesis

EDUCATION

BA, Interaction Design · Example Institute · 2020

PROJECTS

Community appointment concept · Fictional project · 2024

Prototyped keyboard navigation, readable contrast and clear cancellation states.
